

Electronic Health Record System

Team Name: OverEngineered

Team Leader: Mostafa Mahmoud Khedr

Team Members:

- Mostafa Mahmoud Khedr
- Mostafa Mohammad Reda
- Mahmoud Emad Sallam
- Monuir Osama Shebl
- Mohammad Ayman Mosa
- Mohammad Ebrahim Hassan
- Mohammad Hamed Ghaly

Faculty of Computer Science and Artificial Intelligence

University of Sadat City

Project Supervisor: Dr/ Sara Shehab

Group: 2

I. Fragmented Medical Data

A patient, visits a X hospital for chest pain.

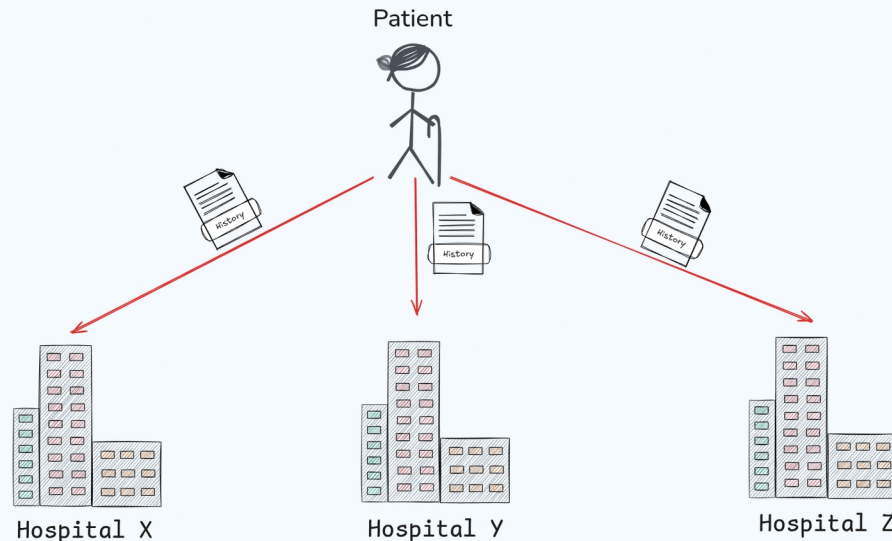

He's prescribed medication and referred for a blood test.

Time later, he visits a different hospital for follow-up.

The new doctor has no access to the patient's previous records/history.

This leads to:

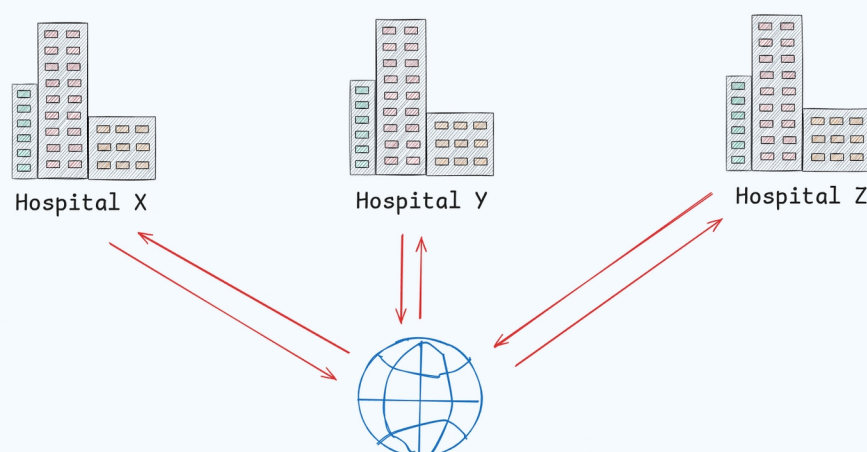

- Repeated tests
- Risk of misdiagnosis
- Poor continuity of care

II. Our Solution (SIJILL)

a unified, portable, and secure EHR platform that creates a lifelong digital health record for every patient, accessible across all healthcare providers.

- Single Source of Truth: All medical encounters, prescriptions, lab results, and imaging reports stored in one secure profile.
- Patient-Controlled Access: Patients grant temporary access to doctors via OTP.

III. Digital Egypt 2030

EHR system is not a new idea, it already exists in developed countries

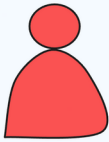

- USA: 
- UK: 
- Estonia: 

And as Egypt is now heading into its digital transformation era, Sijill positions itself perfectly as the foundational EHR layer for a modern, data-driven health system.

IV. Medical Identity

Every citizen will have a digital medical identity.

Name: Mostafa Mahmoud Khedr National ID: xxxxxxxxxxxxxxxx
Date Of Birth: 29/9/2025 Gender: Male
Blood Type: O+

Known Allergies

- Penicillin / Amoxicillin, Sulfa drugs
- Lactose, Gluten, Peanuts

Chronic Conditions

- Hypertension
- Coronary Artery Disease

Active Diagnosis

- NSTEMI

Current Medications

- Amlodipine
- Metformin

Emergency Contact

- +20 100 123 4567 (father)
- +20 100 123 4567 (uncle)

V. Medical Records (Patient Medical History)

When patients visit doctors they give them access to their medical record with an OTP (one time password)

Medical History

I. Medical Identity

II. Medical Encounters (Chronological list)

2024-03-15, 10:30 AM | Cairo Cardiology Center | Dr. Nadia (Cardiologist)

Symptoms & Complaints (SNOMED CT)

- └ "Chest tightness" (29857009)
- └ "Fatigue" (84229001)
- └ "Shortness of breath when climbing stairs"

Diagnosis (ICD-11)

- └ Essential hypertension (BA00)
- └ Coronary artery disease (BA41)

Prescribed Medications

- └ Metformin 1000mg (1x daily) - Continued
- └ Lisinopril 10mg → Increased to 20mg
- └ Aspirin 81mg (New - 1x daily)

Test/Imaging Orders and results
